

BDCP Work Plan
Terrestrial Resources Subgroup

Subgroup Membership: [[To come]]

Co-Chair: Dave Harlow, SWC

Co-Chair: Campbell Ingram, TNC

Purpose and Scope

To review and recommend conservation measures (protection, enhancement, restoration), including mitigation measures, for terrestrial covered species and natural communities that are designed to achieve BDCP biological goals and objectives for adoption by the BDCP Steering Committee. The subgroup will address the following topics related to the conservation measures.

- A. Review and refinement of BDCP proposed tidal marsh, inundated floodplain, and riparian habitat restoration concepts to improve habitat benefits for associated terrestrial covered species while maintaining intended covered fish species benefits.
- B. Review and refinement of initial draft SAIC conservation measures, including avoidance, minimization, and compensation measures.
- C. Review ISA report for terrestrial resources and provide recommendations to SC
- D. Review and refinement of initial opportunities identified by SAIC for protecting, enhancing, and restoring covered terrestrial species habitats within the Delta and Suisun Bay/Marsh.
- E. Provide recommendations for refining working draft terrestrial species and natural community biological goals and objectives to the Biological Goals and Objectives Working Group.
